

Lincroft Academy School Information Report 2024 - 2025

We want the highest possible standard of education and care for all our students at Lincroft Academy. Our second 'CARE to Teach' principal centres around adaptive teaching, which promote a classroom culture where our children and young people actively engage with the learning, and where scaffolding is effectively used so that they can meet our high expectations.

We aim to create a positive school community in which each student is known and cared for, and has the opportunity to thrive through intellectual, personal, and emotional growth. We aim to ensure each student can fulfil their potential and have the chance to excel as they move into young adulthood.

Contact or raising parent concerns:

The first point of contact is the House Team, where we focus on a graduated response to any concerns or issues that might be raised. The email addresses for the House Teams can be found on this link: [Contact Us – Lincroft Academy](#).

The SENDCo works closely with the Houses and will join meetings to discuss any concerns families might have regarding progress or SEN needs, as we work collaboratively to support all our students. If a further meeting is required, then a separate appointment can be made at any point in the school year.

SEND administrator: jtaylor@lincroft.academy

Our SENCO is Mr Thom Johnson: tjohnson@lincroft.academy

Students with SEN fall under the following categories:

- Cognition and Learning
- Social, Emotional and Mental Health
- Communication and Interaction (Speech and Language Difficulties, Autistic Spectrum Disorder)
- Sensory and Physical (Hearing Impairment, Visual Impairment, Multi-Sensory Impairment / Deaf / Blind, Physical and Neurological Impairment)

Graduated (Wave) Approach:

The school adopts the following graduated approach in accordance with the Code of Practice where a student has SEN.

Wave 1: Quality First Teaching	High quality teaching – reasonable adjustment and adaptation within the classroom will meet the needs of the student so that they progress in line with their peers.
Wave 2: Targeted Support	A short-term intervention programme, where appropriate, is effective in closing the gap with their peers. These could be based around academic, social and emotional, communication, physical or sensory interventions.

Wave 3: Personalised Learning (SEND Support – ‘K’)	If progress at Wave 2 is not sufficient then external support could be sought, and a new cycle of Assess, Plan, Do, Review begins.
Wave 4: Education, Health and Care Plan (EHCP – ‘E’)	An EHC Plan will be considered where expected progress has not been made despite the identification, assessment and intervention around the child or young person’s SEN need. The procedure for this is in the Code of Practice and will be explained to parents where the school feels this is an appropriate course of action. A parent may also request an EHC plan through Bedford Borough Council.

Students may move between these different Waves and the school officially records students at Wave 3 and 4 as part of their ‘SEND register’, which is reported to the DfE as part of their census.

Identifying and assessing need:

Students with potential special educational needs will be identified through a range of assessments and observations, that include baseline testing, teacher referrals, and the House teams working with families. If expected progress is not made in an identified area despite targeted interventions, students will be placed on to Wave 3 and a possible referral to an appropriate agency will be made. Lincroft access a range of agencies to support our students such as Education Psychologists, Visual and Auditory Impairment Advisors, Autism Spectrum Advisory Teachers, the school nurse, CAMHS, CHUMS, Intensive Family Support, Relate, Talk Time, Social Work skills and Speech Therapists. All of which are actioned under the Early Help Assessment process.

We use a 1-Page Profile and APDR document to make sure that all staff are aware of a students need. A ‘tag’ is on the student’s name on the register that includes both documents. Climate walks and book looks are used as part of our quality assurance to monitor this.

Supporting an identified need:

In the first instance the classroom teacher is responsible for adapting the curriculum and using targeted differentiation to support students. The second principal of our CARE to Teach framework focusses on adaptive teaching, making sure that lessons continually test and adapt to the learner’s knowledge, understanding and performance in the room. We also have a range of targeted interventions outside of the classroom, delivered by Teaching Assistants. Some of the main interventions include phonics, comprehension, literacy, numeracy, social communication, and emotional literacy.

Reasonable adjustments are used to adapt curriculum and the environment, including strategies such as movement breaks, adapted movement times, positive seating and sensory breaks.

Assess, Plan, Do, Review (APDR) cycle:

The four-step cycle of “Assess – Plan – Do – Review” is the basis for our whole school approach to identifying and responding to SEND and will support decisions around finding the most accurate Wave.

- **Assess** – this includes a clear analysis of the student’s needs. This is repeated as the student moves through the school to ensure support and intervention are matched to their needs.

- **Plan** – the class or subject teacher and SENDCO, in consultation with the parents and student, will agree the adjustments, interventions and support to be put in place, as well as the expected impact on progress, development or behaviour, along with a clear date for review.
- **Do** – the class or subject teacher remains responsible for working with the student on a daily basis, supported by the SENDCO, teaching assistants or specialist staff as appropriate.
- **Review** – the effectiveness of the support and interventions and their impact on the student's progress should be reviewed in line with the agreed date.

The cycle is then repeated, and teachers and TAs are asked to comment on the impact of the interventions three times a year, around the time that tracking data is collected from departments.

This information is shared with families, and their feedback sought to develop the plan further. We will seek specialist and/or external agency involvement when appropriate and according to need.

Communicating with parents:

Parents and carers will also be informed of the student's progress through school reports, face-to-face parent-teacher consultations, as well as feedback from Assess, Plan, Do, Review (APDR) cycles. The APDR cycle allows us to create a series of outcomes, targets and provisions that we ask Teaching Assistants and teachers to track and give feedback at points throughout the year. Where a student has an EHC Plan that student and their parents will be invited to also attend an annual review meeting.

Students have been asked to contribute to their 1-page profile by stating what they like and dislike, what their aspirations are, and what help they feel they need to support them in school.

Parent surveys and forums are used to collect a wider perspective and can use this to inform how we develop our provision and resources.

Access Arrangements for Exams:

Students in Year 9, who have been identified by external professionals, parents and school staff, as possibly requiring extra support within exams and assessments, will begin the process to gather relevant evidence to support an application for Access Arrangements. This will lead to a necessary Joint Council of Qualifications (JCQ) assessment to allow the necessary Access Arrangements to be in place during their Key Stage 4 education. This will be coordinated by the SENCO in conjunction with the Exam Officer.

Medical Care Plans:

At Lincroft we hold Care Plans and work with families and the School Nurse as part of this process. If a student is unable to access lessons because of a medical need or condition, appropriate support is put in place which is reviewed by professionals surrounding that child or young person.

Access to the site and classrooms:

Lincroft Academy has an Accessibility Plan that makes sure the school site is inclusive to learners and guests. There are lifts available to the first floors of buildings and ramp access around the school. SEND needs are met through communication with outside agencies who are assigned to the student, including visits from occupational therapists to aid adaptation where and when necessary.

We endeavour to provide a safe, secure and achieving environment for students to develop and strive forward in delivering a personal kit of self- tools to overcome adversity.

Inclusion outside the classroom:

We support students in all areas of the curriculum, including school trips and extra-curricular activities and awards. We will liaise with the agencies that are assigned to each student and provide staff training if needed.

There are wheelchair accessible benches available in the covered area for social times, and an indoor space is available for students who need extra support during these times.

We have a homework club for all learners, as well as one that is targeted to our learners with special educational needs.

Transition:

We work closely with the primary schools to support Year 7 students with their transition. We provide extra visits to the school if needed, on top of our two main transition days. The Inclusion team directly contact the SEND support from the primary school to exchange information in advance of the transition. The SENCO will attend the annual reviews and transition meetings for students in Year 6 where it is deemed appropriate. We encourage a thorough transition to make a move as smooth as possible for the student. The SENDCo works alongside the House Teams to ensure transition plans are successful.

Staff training and development:

There is a programme of continual professional development for our staff, which includes specific sessions for SEND. This uses expertise from within the school, the Trust and Bedford Borough; we have Trust SEND training throughout the year, as well as sessions dedicated to school development needs. Bedford Borough professionals provide specialist training for specific areas of need, like hearing impairment, visual impairment, speech and language, work with the Educational Psychology team or Autism Specialist Advisory Team.

There are also Bedford Borough support services who can offer you support, advice and guidance:

- Bedford Borough can offer you impartial advice. E-mail them on sendadvice@bedford.gov.uk or visit the website <https://www.bedford.gov.uk/schools-education-and-childcare/parental-support/send-advice/>
- Bedford Borough Parent Forum <https://www.bbpcf.org.uk/home>

Contact details of support services for parents of pupils with SEND

- Bedford's SEN and Disability Guide is where you can find information about all services for parents, children and young people with SEN and disabilities in Bedford Borough
- "The Local Offer" has two key purposes:
 - 1) To provide clear, comprehensive and accessible information about the provision available; and
 - 2) To make provision more responsive to local needs and aspirations by directly involving

children and young people with SEND, their families and service providers in its development and review.” (SEND Code of Practice)

- Click here to access the Local Offer page: <https://localoffer.bedford.gov.uk/kb5/bedford/directory/home.page>
