

What should I be doing after School to improve my grade?

- Complete the weekly revision and complete it **comprehensively** using past books or a revision guide of online resources. Answer the past questions on the back.
- Make a flashcard for each key study- include 4 key points, which perspective, what method and any evaluation points. Once learnt- blurt or get someone to test you.
- Make a flashcard for each perspective (theory) and a minimum of 4 key concepts. Once learnt – blurt or get someone to test you.
- Create a glossary of key words for each module. AQA has a list of all key words you should know at the back of the specification. This glossary is helpful for decoding questions.
- Revise for in class assessments up to the mock – Produce something that shows my learning i.e. a mind map. Use resources from pause point lessons as a starting point.
- Research online using sites such as **Tutor2U** or Revise Sociology- watch videos and revision sheets or workbooks.
- From now until the mock produce flashcards each week, on key information from the lessons on social stratification.
- Spend at least 20-30 minutes, two-three times a week, revising Sociology
- Make a revision timetable which includes when to revise Sociology and follow it!
- Attend after school revision sessions on a Monday in SS6.
- Print past papers off AQA website. Time yourself a minute a mark. Go back to the mark scheme on AQA to see if you were correct.
- Make yourself exemplar answers by using AI and writing the instruction ‘write me a x grade answer for a Year 11 student to this question ...x.. from AQA Sociology GCSE worth x marks.”
