Summer Task:

Choose one of the topics /tasks from the list below and answer the questions in the transition pack provided

Using the information from the transition pack use the links from the reference library on the tutor2u Geography website to help.

- Global systems and Global Governance
- Population and the Environment
- Changing Places

You will be required to use these once the lessons begin in September, they will be marked on presentation, depth and understanding.

To be completed for the first lesson back, printed and ready to hand in – we will not accept you going off to print during the lesson or emailing for us to print off – the school can provide printing facilities.

Task 1 :

You should answer as many of the questions on Globalisation and Global Governance as you can. Including researching a TNC (transnational company) either Coca Cola or Tata and producing a fact file. You should also be researching one of the global commons (Antarctica) and the threats that it faces.

Task 2 :

You should answer as many of the questions on the Changing Places section of your Transition pack. Including researching Detroit and produce a fact file on the changes it has seen. Include things like a location map and a timeline of events that have affected the city.

Task 3:

You should answer as many of the questions on the Population and Environment section of your Transition pack. Including researching 2 diseases Malaria and coronary heart disease . Create 2 fact files about these diseases. Include things like a prevalence maps , causes and consequences Detroit and produce a fact file on the changes it has seen. Include things like a location map and a timeline of events that have affected the city.
